Supplementary Table 3. Direct comparison of mortality risk by EDI status within the low MAP exposure group in surgical and critically ill patients

Exposures	**Surgical Patients**		**Critically ill Patients**	
	aOR per minute (95% CI)	**P-value**	**aOR per hour (95% CI)**	**P-value**
Exposure time under the low EDI and low MAP	1.46 (1.09 - 1.94)	0.011	1.42 (1.29 - 1.57)	< 0.001
Exposure time under the preserved EDI and low MAP (reference)	1.00 (Reference)	-	1.00 (Reference)	-

aOR=adjusted odds ratio*; EDI*=easy D_AO_2 index; *MAP*=mean arterial pressure.
